

ADMINISTERING MEDICATION AND MONITORING HEALTH CONDITIONS

The Governing Board recognizes that some students may need to take medication prescribed by a physician during the school day in order to be able to attend school. The Superintendent or designee shall develop processes for the administration of medication to such students by school personnel.

(cf. 5141.24 - Specialized Health Care Services)

(cf. 6159 - Individualized Education Program)

Prescribed medication may be administered by the school nurse or other designated trained school personnel only when the Superintendent or designee has received written statements from both a student's physician and parent/guardian. (Education Code 49423; 5 CCR 600)

(cf. 3530 - Risk Management/Insurance)

School staff who administer medication, including epinephrine auto-injections, to students shall receive training from qualified medical personnel on how such medication should be administered as well as training in the proper documentation and storage of the medication.

Staff authorized to administer or assist in administration of the medication shall do so in accordance with administrative regulations and shall be afforded appropriate liability protection.

If the parent/guardian so chooses, he/she may administer the medication to his/her child. In addition, the parent/guardian may designate another individual who is not a school employee to administer the medication to the student.

Self-Administration and Monitoring

Upon written request by the parent/guardian and with the approval of the student's physician, a student with a medical condition that requires frequent treatment, monitoring, or testing may be allowed to self-administer, self-monitor, and/or self-test. The student shall observe universal precautions in the handling of blood and other bodily fluids.

(cf. 4119.43/4219.43/4319.43 - Universal Precautions)

(cf. 5141 - Health Care and Emergencies)

(cf. 5141.22 - Infectious Diseases)
