RFP 20-105
Network Equipment

Questions and Answers

Question: I found your eRate request for Folsom Cordova Unif Sch Dist. I have attached a proposal that includes services you are requesting. If a provider has already been awarded, please disregard this proposal. If it is required that proposals be mailed in, please let me know the address and I can send it.
Our SPIN is 143051061.

Answer: All requests must be mailed in. Please review the RFP.

Question:
Subject Item 9130 APs
In the RFP there is currently only licensing called out for the new 9130 APs.
► Is it the district’s intention to just have the new access points on the controller or are additional licenses needing to be quoted from the RFP numbers?
► If there are more licenses required, how many additional AP licenses should be included in this proposal, and should they be broken down by site or as one group?

Answer: We only need licenses for the 9130 AP’s and they need to be included with each site.
