

CC Writing Prompt: Career Survey

You have just finished the career survey and now you know whether you are a Helper, Investigator, Leader, Organizer, Crafter, or Designer. Well, what does that mean to you? Your job now is to analyze and write down your thoughts as to how the survey may help you identify a career or career area you would be good at. In a ½-page to 1 page typed, 12 font, double-spaced short essay....tell me what your thoughts about the survey results and what it means to you....

Examples:

- You may identify careers that match up to my characteristics and tell the instructor why you believe that is the case.
- You may identify your character strengths and how that would help you in certain careers or a career.
