

## Assignment: "Supply and Demand"- Student Collaboration Project

This assignment is to be done with a partner or in a group of three.

There are different players involved in Economics. The relationship between producers and consumers plays a key role in the "marketplace". In Economic terms we call this "supply and demand". Your summative project for Unit 3 is to make a PowerPoint or Prezi that can be shared with class (and future classes) explaining how the interaction between producers and consumers (supply and demand) in the marketplace works.

Power Point/ Prezi requirements.....

- Must be done in 12-15 slides....
- Title slide that includes all student names (first, last)
- Presentation should include: pictures, graphs, data reference.
- Last slide must cite references and resources used.
- You must reference at least 5 resources or sources.

Your presentation will be posted on the discussion board for other students to comment on.

I have included a link that helps to explain the supply and demand.
