

Create an IPDE poster

- Work with a partner, be creative.....

Square 1- Identify....students must draw a visual of what a driver sees as a potential conflict.

Square 2- Predict....students must draw a visual of what the driver predicts will happen.

Square 3- Decide....students must draw a visual of what types of choices the driver may have to make.

Square 4- Execute....students must draw a visual of what the final decision is and what the driver will do to avoid the conflict.

Your poster should reflect how a driver must go through the IPDE process in order to process and break down information while driving in order to minimize RISK.

Do a sketch on small paper and get Mr. Reed's approval before using the big paper.

Students should take their time and do a good job...I would like to put a few up in the classroom.....
