What is this graph called?

|  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | 9 |  |  |  |  |
|  |  |  | ${ }^{6}$ |  |  |  |  |
|  |  |  | 4 |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  | , |  |  | $\square$ |  |
|  |  | - | 2 |  | , | - |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | - |

## Does this Graph open Up or Down?

Does this Graph have a Max or Min Value? If so, at which point is it located?

## What are the Graph's Zeros? Hint: These are the x-intercepts!

What's the Graph's Y-intercept?

## Write the following using Interval Notation:

Write the following using Interval Notation: (That's when you use the open/closed Parenthesis)

$$
x>6
$$

# Write the following using Interval Notation: 

$$
x \leq 6
$$

Write the following using Interval Notation: (That's when you use the open/closed Parenthesis)

## What's the Graph's Domain?

(Remember: The Domain is all of the $x$-values!)

## What's the Graph's Range?

(Remember: The Range is all of the $y$-values!)

## What's the interval of Increase?

(This must be written in Interval Notation, remember to only use the x-values!)

## What's the interval of Decrease?

(This must be written in Interval Notation, remember to only use the x-values!)

Determine if the table is quadratic or linear using the first and second differences.

Determine if the table is quadratic or linear using the first and second differences.

| $\boldsymbol{x}$ | $\boldsymbol{y}$ |  |  |
| :---: | :---: | :---: | :---: |
|  |  | First <br> Differences |  |
| 0 | 0 |  | Second Differences |
|  |  |  |  |
| 1 | -1 |  |  |
|  |  |  |  |
| 2 | 2 |  |  |
|  |  |  |  |
| 3 | 9 |  |  |
|  |  |  |  |
| 4 | 20 |  |  |
|  |  |  |  |

## Write the Following in Standard Form:

$$
f(x)=2(6 x-3)+3 x^{2}
$$

What are the values of $\mathrm{a}, \mathrm{b}$, and c in this Function?

$$
f(x)=3 x^{2}+12 x-3
$$

## Find the $y$-intercept of this function

$$
f(x)=3 x^{2}+12 x-3
$$

## Will this function open up or down?

(Hint: It's based off the value of a)

$$
f(x)=3 x^{2}+12 x-3
$$

## Determine the Zeroes of the function in factored form:

$$
f(x)=(x-12)(x-2)
$$

## Factor

(Hint: Use the GCF!)

$$
f(x)=2 x y+12 x^{2} y^{4}-36 x^{24} y^{2}
$$

## Multiply:

$$
f(x)=(x-3)(2 x+3)
$$
