

## Warm Up

1) Are the rationals closed under, (add, subt, mult, div.) if not give a counter example.
2) Write each of the following as a fraction.
a) . 245245245 ...
b) . 43434343 ...
3) Simplify each of the following
a) $\sqrt{-99}$
b) $x^{-4} x^{12}$
c) $\left(x^{3}\right)^{8}$

## Chap. 16 Sect 1: Learning Target

- I can identify and graph Piecewise Functions
- I can identify and graph Abs Value functions

## Piecewise Function

A function that uses multiple equations on non-overlapping intervals to express change between an input and output.

$$
f(x)=\left\{\begin{array}{cc}
2 x+1 & 0 \leq x<3 \\
7 & 3 \leq x \leq 6 \\
-\frac{1}{2} x+10 & 6<x \leq 10
\end{array}\right.
$$

$$
f(x)=\left\{\begin{array}{cc}
-2 x-3 & x<-1 \\
x-5 & x \geq-1
\end{array}\right.
$$

|  |  |  |  |  |  | $y$ - |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  | 6 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 5 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 4 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 3 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 2 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 1 |  |  |  |  |  |  |  |
| $4$ | $-5$ | -4 | -3 | -2 | -1 |  | 0 | 1 | 2 | 2 | 3 | 4 | 5 |  |
|  |  |  |  |  |  |  | -1 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | -2 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 3 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | -4 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 5 |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | , |  |  |  |  |  |  |  |

Use either the endpoints method or the erasing method.

## Evaluating Piecewise Functions

We can evaluate a piecewise function by plugging the inputs into the appropriate equation for where they exists.

$$
\begin{gathered}
f(x)=\left\{\begin{array}{cc}
2 x+2 & 0 \leq x<3 \\
1 & 3 \leq x \leq 4 \\
-x+10 & 4<x \leq 10
\end{array}\right. \\
f(7)=\quad f(1)=r(4)=
\end{gathered}
$$

## Absolute Value Function

A $V$-Shaped piecewise function that is made from two lines that have opposite(+/-) slopes.

$$
\begin{aligned}
& f(x)=\left|\frac{1}{2} x\right|-1 \\
& f(x)=\left\{\begin{array}{rr}
-\frac{1}{2} x-1 & x \leq 0 \\
\frac{1}{2} x-1 & x \geq 0
\end{array}\right.
\end{aligned}
$$

$$
f(x)=|2 x|-5
$$
